

Position: Reproductive Endocrinologist (REI)

Status: Full Time

ReproMed, the Toronto Institute for Reproductive Medicine is seeking a Reproductive Endocrinologist to join its world class medical team. Working jointly with our Medical Director, the candidate will be proficient in all aspects of Reproductive Medicine and Assisted Reproductive Technologies (ART).

This is an opportunity for an established REI, or one new to the field, to expand their practice and expertise in the area of Reproductive Medicine. In addition to participating in on-going clinical research, the candidate will diagnose and treat patients experiencing infertility. This role will report directly to the Medical Director and provide care in a clinical and surgical environment (with two operating theatres on-site) while working alongside the IVF laboratory and Andrology laboratory.

Core Responsibilities

- Complete initial consultations / assessments with referred patients to the clinic.
- Prescribe appropriate in-house testing of both male & female patients in determining potential causes of infertility.
- Recommend appropriate in-house treatment options in follow-up consultations with patients.
- Complete medical / surgical ART procedures in onsite operating facilities
- Recognize patient cases that would benefit from complementary therapies such as counseling or acupuncture.
- Assist the Medical Director in consultations and surgical procedures when needed.
- Practice medicine in accordance with all guidelines set out by: the College of Physicians and Surgeons of Ontario (CPSO), the CPSO Out-of-Hospital Premises Guidelines, Health Canada, and the Canadian Fertility & Andrology Society.
- Partake in on-going clinical research programs
- Partake in association based events (CFAS, ASRM, Rounds, etc.) for continued education in the field of Reproductive Medicine

Contacts:

The position interacts closely with the Director of Embryology, the Director of Andrology, and the Medical Director. In providing optimal care to patients, there is an active collaboration with Patient Services Team (PST), the Nursing Unit (NU), and other technicians providing day-to-day care.

Qualifications

- Licensed (or eligible to be licensed) to practice medicine in the province of Ontario.
- Fellowship (or similar post-graduate training) in reproductive endocrinology.
- Completed residency in Obstetrics and Gynecology
- 2-4 years medical/surgical experience in all areas of Reproductive Medicine / ART.
- Advanced Cardiac Life Support (ACLS) Certified
- Full understanding of key procedures: In-Vitro Fertilization, ICSI, Ovarian Stimulation
- Familiarity with third-party reproduction (egg donation & surrogacy)
- Strong ability to communicate compassionately and effectively with patients.
- A ðteam playerö committed to and promoting the values of the clinic.
- Commitment to professional practice and personal development
- Strong command of the English language

Preference will be given to Canadian Residents or Landed Immigrants.
