

Position: Senior Nurse

Status: Full Time

ReproMed is looking for a Nurse to assist in delivering surgical and clinical activities performed in an infertility clinic. The Nurse will collaborate with all team members to achieve operational and patient-focused care objectives within a public and private healthcare system.

This is an opportunity for a clinical Nurse with interest or experience in in-vitro fertilization to provide patient-focused competencies in an environment that provides infertility solutions to a diverse client base. The company will be providing patient care within a clinical and surgical environment with two operating theatres on-site alongside the IVF laboratory and Andrology laboratory. This role will report directly to the Medical Director.

Core Responsibilities

- Interviewing new infertility patients and recording their medical history.
- Follow-up interviews with infertility patients, explaining the program in detail, providing further information and literatures packages as required, i.e. counseling them regarding their diagnosis, treatment, protocol as explained by the physician.
- Keeping accurate pregnancy data and records of infertility patients.
- Arranging for prescription and dealing with the pharmacies, dispensing medications and keeping inventory records according to the mandate of the College of Physician and Surgeon of Ontario.
- OR and diagnostic test bookings.
- Pre, Intra Post operative care in In Vitro Fertilization (IVF) related procedures.
- Maintaining the utmost confidentiality with respect to all patients.
- Keeping an accurate inventory of all medical supplies and submitting orders as needed.
- Giving injections and venipuncture.
- Assisting the physician and performing artificial inseminations as instructed .
- Computer skills is required.

Contacts:

The position interacts closely with the Patients in delivering medical services in collaboration with the Manager - Patient Services and with the President / Chief Medical Officer. Internal contacts include the IVF Director, the Andrology Director, and the Controller / Administrative staff.

Qualifications

- 5-7 years medical/surgical experience required.
- Advanced Cardiac Life Support (ACLS) Certified
- Current certificate of registration with the College of Nurses of Ontario.
- BScN.
- Previous in-vitro fertilization clinical experience preferred but not essential.
- Commitment to professional practice and personal development.
- Commitment to shared leadership and team based decision making.
- Demonstrated excellent critical thinking, problem solving and decision making skills.
- Superior interpersonal and communication skills.
- Commitment to patient centered care.
- Demonstrated pattern of good attendance and work performance.
